QUIZ MASTER

Aadita Nag

DS23F2000181

23f2000181@ds.study.iitm.ac.in

I am a dual degree student currently studying BE CSE and BS in DS. I am good with frontend and know html, css pretty well. I am currently working on my 3D development skills.

Description

This project needs 3 parts according to me. We need to work with the database, Link it to the main program, Code the backend, so that it takes input from the users and design the frontend for a good user experience.

Technologies used

Flask
Used for the Routes, request handling, and as the foundation of the app

Flask-Login
Used for login/logout functionality and protecting routes with @login_required

SQLAlchemy
Handling the database operations

Flask-Migrate
Managing database schema changes

Werkzeug Security
Securely storing user passwords

DB SCHEMA DESIGN

Architecture and features

So i have the main folder with the name Quiz Master, then it divides into various folders

1. App
   a. Contains all the python files
2. Template
   a. Contains all the html files
3. Intense
   a. Contains the database
4. Run python file
   a. This will be run in the terminal
5. Readme document
   a. It consists the basic instructions on how to run the file
